

BUGZ - EYE

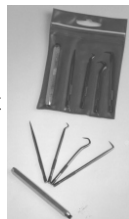

No Focus Magnifier

Believe me ~ you will find a use for this unique tool ~ the older you get, the more uses you will find

- * Perfect for reading blueprints, phone books, time slips, roadmaps, etc.
- * Leave one in the glove compartment and you *will* use it
- * Complete with vinyl storage pouch

All of us have enjoyed the task of removing Spiroloks from the pistons. This little kit will take a lot of work out of this frustrating chore. You will find hundreds of uses for this pick set.

Made in the USA, heat-treated tool steel w/ an aluminum handle and handy magnet inserted in the handle end. The picks are a tool box must for all engine builders, mechanics or machinists.

Spiral Lok Tru Arc Removal Pick Set

This is one of the handiest layout tools you can have in your tool box. You can center punch scribed lines with unbelievable accuracy.

- * Simply place cone over your scribed lines
- * Insert magnifier & align scribed lines with the cross lines on the bottom of the magnifier.
- * Hold cone in position, remove the magnifier and insert center punch and tap with hammer to mark center

Overall Length: 1 3/4"
Body Diameter: 1 3/8"

Optical Center Punch

Self Aligning Tapper

As most of you know, it is very difficult to start a tap straight. This little tool will save a lot of frustration and ruined parts. It automatically squares and trues up the tap with the hole which will stop a lot of tool breakage. The base is also milled with a 120 degree "V" for round work.

Complete with Hardened Steel Jaws

Engine builders and dyno operators have successfully used "Blow By" as a prime indicator of ring seat efficiency. Properly used in conjunction with a leak-down meter, you can accurately monitor your engine's condition.
